Parents of No 29 - There were two William Cannon's who were married in the year 1660; one of them in July wedded Katherine Quayle, the other in September wedded Eleanor Lewin. Which one of these is our direct ancestor I cannot tell. My idea is that they were cousins, and that neither of them was the father of No 29, but that one or the other was his grandfather. If this theory is correct, (and the dates, etc., seem to support it) then there is a missing link in our chain of connection with the William Cannon born about 1640. With present information of what may be considered an accurate nature, our earliest Cannon ancestor is therefore John Cannon, (No 29) born about 1669. There were two other Cannons of the 17th century - one married Molly Quayle in 1673, the other married Isabella Crowley in 1694.

You will see from the foregoing (which only ab-

tempts to give briefly the record of our direct
line - not any of the collateral branches) - that
we have the genealogy of Father's 2 grand-
fathers, his 4 great-grandfathers, ~~seven out of~~
his eight 2^d ^{(- one of them being a common parent on both sides) -} great-grandfathers, and three out
of his sixteen 3^d great-grandfathers - with their
respective wives - and this without taking into
account the earlier generation to which one
these many Williams undoubtedly belongs.
